## **DT3**

Integrating Testing into DevOps

Thursday, November 8th, 2018 10:00 AM

## **Shift Left: Continuous Performance Testing in the CI/CD Pipeline**

Presented by:

**Gajan Pathmanathan**

Quicken Loans

Brought to you by:

350 Corporate Way, Suite 400, Orange Park, FL 32073  
888-268-8770 · 904-278-0524 - [info@techwell.com](mailto:info@techwell.com) - <http://www.starwest.techwell.com/>

# Gajan Pathmanathan

Gajan Pathmanathan is a quality evangelist, DevOps enthusiast, and engineering leader with fifteen years of experience in designing, developing, and testing software. He currently leads the Enterprise Quality Architecture team at Quicken Loans, where he is responsible for implementing solutions and strategies for continuous quality and quality-driven development across the enterprise. Before joining Quicken Loans, Gajan worked at Intel Security/McAfee as a lead engineer and led the team that was responsible for defining quality processes and test automation processes across the organization. Gajan holds a master's degree in computer engineering from the University of Waterloo, Canada, and he is a certified SOA Architect and ScrumMaster. Gajan has given guest lectures at technical institutes and spoken regularly at technical conferences across Canada and the United States.

**What is Continuous Performance Testing?**

Dictionary 

Enter a word, e.g. 'pie' 

## per·for·mance test·ing

*noun*

the process of evaluatiing of the quality or capability of a product.  
 "in a software development life cycle, performance testing is a vital activity"

- the process of evaluating of the heritable characteristics of a farm animal or cultivated crop.  
 "careful performance testing allows the quality of potential breeding bulls be determined at an early age"

 Translations, word origin and more definitions

# Continuous Performance Testing

A process of executing automated performance tests as part of delivery pipelines

## Types

- Performance Smoke/Regression Testing
- End-to-End Performance Testing

**The Why Behind The What**

*“You can fix it now on the drafting board with an eraser, or you can fix it later on the construction site with a sledgehammer.”*

## Performance & User Behavior

47% of consumers expect a web page to load in 2 seconds or less.

40% abandon a website that takes more than 3 seconds to load.

79% of users who are dissatisfied with website performance are less likely to return.

52% of users state that quick page loading is important to their site loyalty.

A 1 second delay (or 3 seconds of waiting) decreases customer satisfaction by about 16%.

44% of users will tell their friends about a bad experience online.

★★★★★ **Surprising Results**  
By [a fan](#) on December 31, 2013

I tried to file my nails, but in the process I accidentally fixed a small engine that was near by. Which was nice

★★★★★ **Amazing**

By [SoTexSmoker](#) on May 27, 2014

I added this knife to the cart and it told me the sex of my unborn child....! Wow I'm amazed.

★★★★★ **Man 1 - Grizzlies 0**  
By [Kenny Patterson](#) on February 1, 2015

With this, I once fought off a family of hungry grizzlies by simply pulling it out of my pocket. They apologized for the inconvenience and left.

# Jenkins

- Open source desktop application written in Java
- Plugin-based architecture
- 20+ years in existence

- Open source tool written in Python
- 5+ years in existence
- Code-driven framework

- Open source automation framework written in Python

## Feature comparison

Feature	JMeter	Locust
Open Source	Yes	Yes
Operating System	Any	Any
GUI	Yes (non-GUI mode available)	No
Recording Functionality	Yes	No
Test Recorder	HTTP	No
Test Language	XML	Python
Extension Language	Java, Beanshell, Javascript, Jexl	Python
Load Reports	CSV, XML, Embedded Tables, Graphs, Plugins	HTML

## Feature comparison

Feature	JMeter	Locust
<b>Protocol Support (in-built)</b>	HTTP, FTP, JDBC, SOAP LDAP, TCP, JMS, SMTP POP3, IMAP	HTTP
<b>Execution Monitoring</b>	Console, File, Graphs Desktop client Custom plugins	Console Web
<b>Integrated Host monitoring</b>	Yes (PerfMon plugin)	No
<b>Support of "Test as Code"</b>	Weak (Java)	Strong (Python)

## Feature comparison

Feature	JMeter	Locust
<b>Distributed Execution</b>	Yes	Yes
<b>Easy to use with VCS</b>	No	Yes
<b>Resources Consumption</b>	More resources required	Less resources required
<b>Number of Concurrent Users</b>	Thousands (under restrictions)	Thousands
<b>Ramp-up Flexibility</b>	Yes	No
<b>Test Results Analyzing</b>	Yes	Yes

## Let's Look at...

- JMeter & Taurus Command Line Tool (bzt)
- Locust & Taurus Command Line Tool (bzt)
- Integration with Jenkins (Build step)
  - Command (bat or sh)
  - Performance plugin
